

LAMBDA

THE HOME OF LASER

LAMBDA s.p.a.

LAMBDA

THE HOME OF LASER

Not far from Venice, Italy, an active young company has been making laser technology its core business since almost 20 years.

Love and passion towards this extraordinary technology have made LAMBDA one of the most well established players on the international market.

BORN TO BE KIND

The experience of LAMBDA started in 1996 with the production of equipment for cultural heritage restoration.

The first laser equipment for the cleaning of artwork was produced after a short time.

CULTURAL HERITAGE CONSERVATION

Thanks to the experience acquired over the years, the company became quickly able to produce more performing equipment.

After a while LAMBDA was appointed as official partner of many of Italian heritage sites, museums and cultural institutions.

THE VALUE OF A GREAT EXPERIENCE

The great experience acquired in such a specialized field, led the company grow quickly in the years, looking ahead to new frontiers.

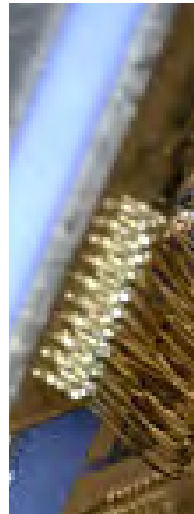

In order to face everyday challenges, LAMBDA staff is today formed only by highly qualified members.

THE STRENGTH OF KNOWING OUR SKILLS

Highly skilled personnel is in charge of the production process, during which maximum quality standards are reached.

Physicians, optical and electronic engineers are involved in each single production stage, to ensure the best technological and scientific level.

FOR THE CULTURAL HERITAGE AS FOR THE HUMAN BEING

Since 2000 the company specializes in the production of lasers for the medical and dental field.

Thanks to the high technology level acquired, LAMBDA is nowadays the only Italian producer of erbium and diode laser.

2003

AN UNFORGETTABLE YEAR

In 2003 the brand DOCTOR SMILE was created.

With the launch of this new line, the company entered the dental market with a clear mission: provide equipment that is useful and close to dentist's needs.

doctor smile®
dental laser

A COMPLETE LINE

Today Doctor Smile is well known in the medical and dental market mainly for two products:

▶ **WISER**

The diode laser for the soft tissue surgery, biostimulation and therapy treatment

▶ **PLUSER**

The erbium laser for the hard, soft and bone tissue surgery and for the medical aesthetics

A GLOBAL CHALLENGE

The great success achieved in the domestic market, led the company internationalize the brand. The perfect occasion was IDS 2007 in Cologne, where the new line of diode and erbium laser was presented. Today DOCTOR SMILE is distributed in over 25 countries.

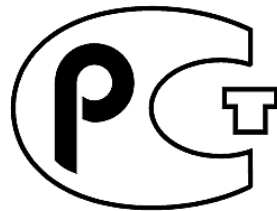

QUALITY?

TAKE IT SERIOUSLY

Our equipment are certified medical device accordingly to Vision 2009 and 93/42.

Thanks to our high standards, LAMBDA has acquired international certifications as well, to enter the products in highly competitive markets.

EDUCATIONAL FIRST

From the very beginning LAMBDA has always invested in educational programs. With reliable, certified and guaranteed clinical protocols, LAMBDA is constantly and actively collaborating with universities and institutions in order to provide high level and up-to-date training courses.
