

# FLAT TOP HANDPIECE AB2799

doctor smile<sup>®</sup>  
dental laser

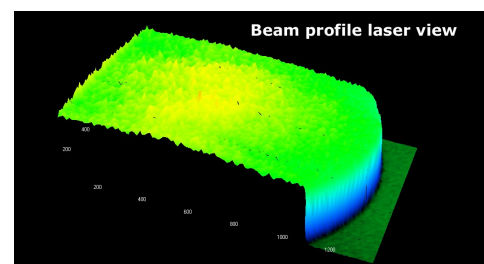

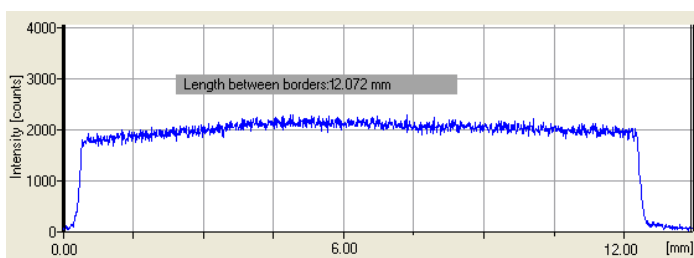

Created thanks to a project developed by Prof. Alberico Benedicenti, University of Genoa, Italy, the AB2799 Flat top is a no contact extra-oral handpiece that spreads the energy of the laser beam evenly over the treated area. It can be used at a variable distance of up to 105 cm without modifying the irradiation energy over a 1 cm spot diameter. The handpiece is ideal for antalgic therapy and biostimulation.

Features: equal beam properties from 0 to 105cm distance.

## TECHNICAL DATA

Code	FLAT TOP HANDPIECE AB 2799 SMA - LAFIO012.1 WISER FLAT TOP HANDPIECE AB 2799 - LAFIO013.1
Compatibility	Doctor smile WISER, Simpler, D5, D30 and other lasers on demand.
Contains	Handpiece and integrated optical fibre (length 160cm)

These diagrams illustrate the even power distribution of the laser beam profile at 1 W power setting.
