

FULLFIELD HANDPIECE

doctor smile[®]
dental laser

The FULL FIELD handpiece for the PLUSER erbium laser for aesthetics and dermatology comes with three spacers for 2 mm, 3 mm and 5mm spot sizes. It is recommended for the removal of skin lesions and scars.

It is especially recommended for precise tissue ablation, vaporization and coagulation of different tissue layers in dermatology for conditions such as acne, scar improvement, senile fades, skin cleansing, xanthelasma palpebrarum, solar keratosis, seborrhoeic warts, nevi, face melasma and milia.
