

# EVENT UPDATE

## Doctor Smile at the OMFS congress, Tehran

October 17-19<sup>th</sup>, 2012. Tehran, Iran.

At the 11th International Congress of the Iranian Society of oral and Maxillofacial surgeons held in Tehran from the 17th to 19th of October, the more than 1700 participants showed great interest in laser applications in oral surgery. The participation of Prof. Stefano Benedicenti, director of the Laser Surgery and Laser Therapy Center of the University of Genoa, Italy, raised a new awareness of the potential of the laser in oral and maxillofacial applications.

Thanks to the attention that now surrounds laser dentistry and hard tissue surgery, very soon a new course will be activated in Iran thanks to the collaboration with Doctor Smile and the University of Genoa, Italy: the Fellowship in Laser Dentistry Post Graduate diploma offers a comprehensive course on the use of lasers for dental and surgical applications with and articulated program held by laser experts from around the world.

Find out more about this educational opportunity by contacting [info@doctor-smile.com](mailto:info@doctor-smile.com) or visit the course website:
