HOW IT'S MADE: DENTAL LASERS

This event aims at offering in depth knowledge of dental lasers, their technology and their use in dentistry. Thanks to the presence of our laser tutors, academics and practitioners who use the laser every day, participants will have the opportunity to individually try different types of lasers and learn how they can revolutionize their daily practice. During the visit to the LAMBDA premisis, the design, innovation and production process behind dental lasers will be unveiled!

Laser tutors

Dott. Capobianco - Dott. Salmini Sturli - Dott. Maleki -
Dott. Tempesta - Dott. Caccianiga

Laser Specialists:
