

Doctor smile in Bangkok

December 14–16th, 2011, Bangkok, Thailand

The doctor smile Simpler laser continues to move towards new horizons: at the TDA dental exhibition in Bangkok, Thailand, great interest was shown for this simple and affordable laser. Our Thai partners featured the Simpler laser in their stand, along with the entire doctor smile product range. Any dental practice can now invest in this extraordinary technology that increases patient comfort: less pain and less anaesthetic means less fear and anxiety! Dentists will also benefit from the fast treatment and faster healing of their patients! Dentists who gain expertise in laser use can expand the functions and treatments available on the Simpler laser by upgrading to the ADV+ version and downloading special apps for specific treatments. For more information visit www.doctor-smile.com.

Yet another achievement in Asia for the world wide doctor smile brand!
